Global Infinity General Trading FZE

Safety Data Sheet

1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product Identifier

Material Name : SPO Slack Wax (Pernis)
Product Code : 001C1892
REACH Registration No. : 01-2119489284-28-0011, 01-2119489284-28-0014, 01-2119489284-28-0019, 01-2119489284-28-0004, 01-2119489284-28-0018, 01-2119489284-28-0015

1.2 Relevant identified uses of the substance or mixture

Product Use : Slack Wax Please refer to Ch16 for the registered uses under REACH.

1.3 Details of the supplier of the substance or mixture

Manufacturer/Supplier : INFINITYEXPORT

1.4 Emergency Contact : WWW.INFINITYEXPORT.COM

2. HAZARDS IDENTIFICATION

2.1 Classification of substance or mixture

2.2 Label Elements

Labeling according to Regulation (EC) No 1272/2008

Symbol(s) : No symbol

Signal Words : No signal word

Address: P.O.Box. 326415, Ras Al Khaimah, U.A.E. www.infinityexport.org
CLP Hazard Statements

PHYSICAL HAZARDS:
Not classified as a physical hazard under GHS criteria.

HEALTH HAZARDS:
Not classified as a health hazard under GHS criteria.

ENVIRONMENTAL HAZARDS:
Not classified as an environmental hazard under GHS criteria.

CLP Precautionary statements
Prevention : No precautionary phrases.
Response : No precautionary phrases.
Storage : No precautionary phrases.
Disposal : No precautionary phrases.

Labeling according to Directive 1999/45/EC, 67/548/EEC

EC Symbols : Not classified as dangerous under EC criteria.
EC Classification : Not classified as dangerous under EC criteria.

2.3 Other Hazards

: Not classified as flammable but will burn.
Used oil may contain harmful impurities.

3. COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substance
Material Name : Slack Wax
CAS No. : 64742-61-6

3.2 Mixtures
Preparation Description : Product is not a mixture according regulation 1907/2006/EC.

4. FIRST AID MEASURES

4.1 Description of First Aid Measures
Global Infinity General Trading FZE

General Information: Not expected to be a health hazard when used under normal conditions.
Inhalation: No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.
Skin Contact: Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.
Eye Contact: Flush eye with copious quantities of water. If persistent irritation occurs, obtain medical attention.
Ingestion: In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.

4.2 Most important symptoms/effects, acute & delayed: Oil acne/folliculitis signs and symptoms may include formation of black pustules and spots on the skin of exposed areas. Ingestion may result in nausea, vomiting and/or diarrhoea.
4.3 Indication of immediate medical attention and special treatment needed: Treat symptomatically.

5. FIRE FIGHTING MEASURES

Clear fire area of all non-emergency personnel.

5.1 Extinguishing Media: Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.

Unsuitable Extinguishing Media: Do not use water in a jet.

5.2 Special hazards arising from substance or mixture: Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide. Unidentified organic and inorganic compounds.

5.3 Advice for fire-fighters: Proper protective equipment including breathing apparatus must be worn when approaching a fire in a confined space.

6. ACCIDENTAL RELEASE MEASURES

Avoid contact with spilled or released material. For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. See Chapter 13 for information on disposal. Observe the relevant local and international regulations.

6.1 Personal Precautions, Protective Equipment and Emergency Procedures: Avoid contact with skin and eyes.

6.2 Environmental Precautions: Use appropriate containment to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.

6.3 Methods and Material for Containment and Clean Up: Slippery when spilt. Avoid accidents, clean up immediately. Prevent from spreading by making a barrier with sand, earth or other containment material. Reclaim liquid directly or in an
7. HANDLING AND STORAGE

General Precautions: Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Properly dispose of any contaminated rags or cleaning materials in order to prevent fires. Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.

7.1 Precautions for Safe Handling: Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used.

7.2 Conditions for safe storage, including any incompatibilities: Keep container tightly closed and in a cool, well-ventilated place. Use properly labelled and closeable containers. Storage Temperature: 0 - 50°C / 32 - 122°F. Store separately from oxidising agents.

7.3 Specific End Uses: Not applicable

Additional Information: Polyethylene containers should not be exposed to high temperatures because of possible risk of distortion.

Recommended Materials: For containers or container linings, use mild steel or high density polyethylene.

Unsuitable Materials: PVC.

8. EXPOSURE CONTROLS: PERSONAL PROTECTION

If the American Conference of Governmental Industrial Hygienists (ACGIH) value is provided on this document, it is provided for information only.

8.1 Control Parameters

Occupational Exposure Limits

Biological Exposure Index (BEI)
Data not available

PNEC related information: Substance is a hydrocarbon with a complex, unknown or variable composition. Conventional methods of deriving PNECs are not appropriate and it is not possible to identify a single representative PNEC for such substances.

8.2 Exposure Controls
Global Infinity General Trading FZE

General Information: The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate ventilation to control airborne concentrations. Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

Occupational Exposure Controls

Personal Protective Equipment: Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye Protection: Wear safety glasses or full face shield if splashes are likely to occur. Approved to EU Standard EN166.

Hand Protection: Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection: PVC, neoprene or nitrile rubber gloves. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, glove thickness, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.

Body protection: Skin protection not ordinarily required beyond standard issue work clothes.

Respiratory Protection: No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for combined particulate/organic gases and vapours [boiling point >65 °C (149 °F)] meeting EN14387.

Thermal Hazards: Not applicable.

Monitoring Methods: Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

Environmental Exposure Controls

Environmental exposure control measures: Minimise release to the environment. An environmental assessment must be made to ensure compliance with local environmental legislation.
9. PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

Appearance : Yellow. Semi-solid at ambient temperature.
Odour : Slight hydrocarbon.
pH : Not applicable.
Initial Boiling Point and Boiling Range : > 280 °C / 536 °F estimated value(s)
Congealing point : 50 °C / 122 °F
Flash point : Typical 200 °C / 392 °F (PMCC / ASTM D93)
Upper / lower Flammability or Explosion limits : Typical 1 - 10 % (V) (based on mineral oil)
Auto-ignition temperature : > 320 °C / 608 °F
Vapour pressure : < 0,5 Pa at 20 °C / 68 °F (estimated value(s))
Density : Typical 780 kg/m3 at 70 °C / 158 °F
Water solubility : Negligible.
Solubility in other solvents : Data not available

n-octanol/water partition coefficient (log Pow) : > 6 (based on information on similar products)
Dynamic viscosity : Data not available
Kinematic viscosity : Typical 3,5 mm2/s at 100 °C / 212 °F
Vapour density (air=1) : > 1 (estimated value(s))
Evaporation rate (nBuAc=1) : Data not available
Decomposition : Data not available
Temperature : Data not available
Flammability : Data not available

9.2 Other Information

Other Information : Not applicable.

10. STABILITY AND REACTIVITY

10.1 Reactivity : The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

10.2 Chemical Stability : Stable.

10.3 Possibility of Hazardous Reactions : Reacts with strong oxidising agents.

10.4 Conditions to Avoid : Extremes of temperature and direct sunlight.

10.5 Incompatible Materials : Strong oxidising agents.

10.6 Hazardous Decomposition Products : Hazardous decomposition products are not expected to form during normal storage.

11. TOXICOLOGICAL INFORMATION

11.1 Information on Toxicological effects
Basis for Assessment: Information given is based on data on the components and the toxicology of similar products.

Likely Routes of Exposure: Skin and eye contact are the primary routes of exposure although exposure may occur following accidental ingestion.

Acute Oral Toxicity: Expected to be of low toxicity; LD50 > 5000 mg/kg, Rat

Acute Dermal Toxicity: Expected to be of low toxicity; LD50 >2000 mg/kg, Rabbit

Acute Inhalation Toxicity: Not expected to be a hazard.

Skin Corrosion/Irritation: Expected to be slightly irritating. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Serious Eye Damage/Irritation: Expected to be non-irritating to eyes.

Respiratory Irritation: Inhalation of vapours or mists may cause irritation to the respiratory system.

Respiratory or Skin Sensitisation: Not expected to be a skin sensitizer.

Aspiration Hazard: Not considered an aspiration hazard.

Germ Cell Mutagenicity: Not expected to be mutagenic.

Carcinogenicity: Not expected to be carcinogenic.

Reproductive and Developmental Toxicity: Not expected to impair fertility. Not a developmental toxicant.

Specific target organ toxicity - single exposure: Not classified.

Specific target organ toxicity - repeated exposure: Not expected to be a hazard.

Additional Information: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal. ALL used oil should be handled with caution and skin contact avoided as far as possible.

12. ECOLOGICAL INFORMATION

Basis for Assessment: Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products.

12.1 Toxicity

Acute Toxicity: Poorly soluble mixture. (LL/EL50 expressed as the nominal amount of product required to prepare aqueous test extract).

Fish: Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l

Aquatic Invertebrates: Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l

Algae: Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l

Microorganisms: Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l

Chronic Toxicity

Fish: NOEC/NOEL expected to be > 100 mg/l (based on modeled data)

Aquatic Invertebrates: NOEC/NOEL expected to be > 1.0 - <= 10 mg/l (based on test data)
12.2 Persistence and degradability : Expected to be inherently biodegradable.

12.3 Bioaccumulative Potential : Contains components with the potential to bioaccumulate.

12.4 Mobility : Semi-solid under most environmental conditions. Floats on water. If it enters soil, it will adsorb to soil particles and will not be mobile.

12.5 Result of the PBT and vPvB assessment : The substance does not fulfill all screening criteria for persistence, bioaccumulation and toxicity and hence is not considered to be PBT or vPvB.

12.6 Other Adverse Effects : May cause physical fouling of aquatic organisms.

13. DISPOSAL CONSIDERATIONS

13.1 Waste Treatment Methods

Material Disposal : Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Do not dispose into the environment, in drains or in water courses.

Container Disposal : Dispose in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.

Local Legislation : Disposal should be in accordance with applicable regional, national, and local laws and regulations.

EU Waste Disposal Code (EWC): 13 08 99 oil waste not otherwise specified. Classification of waste is always the responsibility of the end user.

14. TRANSPORT INFORMATION

Land transport (ADR/RD):

ADR
This material is not classified as dangerous under ADR regulations.

RID
This material is not classified as dangerous under RID regulations.

Inland waterways transport (ADN):
This material is not classified as dangerous under ADNR regulations.

Sea transport (IMDG Code):

Address: P.O.Box. 326415, Ras Al Khaimah, U.A.E.  www.infinityexport.org
Global Infinity General Trading FZE

This material is not classified as dangerous under IMDG regulations.

Air transport (IATA):
This material is not classified as dangerous under IATA regulations.

15. REGULATORY INFORMATION

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Other regulatory Information
Authorisation and/or Restrictions in Use : Product is not subject to Authorisation under REACH.

Chemical Inventory Status

EINECS : All components listed or polymer exempt.

TSCA : All components in compliance.

15.2 Chemical Safety Assessment : A Chemical Safety Assessment was performed for this substance.

16. OTHER INFORMATION
